OCTIMS.org

Take a first look at OCT in MS

OCTIMS.org is a central resource for healthcare professionals, providing a wealth of information on the potential role of optical coherence tomography (OCT) in multiple sclerosis (MS), including:

- Up-to-date insights from leading experts in the fields of OCT and MS
- Literature reviews of existing data on OCT in MS

The OCTIMS study Changing the way we see MS

Sponsored by Novartis Pharma AG, the OCTIMS study embodies the Novartis commitment to ongoing research and innovation in MS. Currently underway, this study aims to validate a technique that may literally change the way we see the disease.

- **1999**—The first evidence was published that retinal nerve fibre layer (RNFL) thickness, measured by OCT, is decreased in MS patients
- **2007**—A multidisciplinary, expert panel confirmed the potential role of OCT in MS research and therapy
- **Today**—OCTIMS seeks to validate RNFL thickness and other OCT parameters as potential markers of neurodegeneration in a variety of MS subtypes
- **Tomorrow**—OCT may serve as a complementary tool to MRI suitable for routine monitoring of MS*

*Magnetic resonance imaging (MRI) is the principal imaging tool available for detecting the development and progression of MS, and a variety of techniques can be used to identify the number and volume of clinically silent lesions, as well as reveal active inflammation and migration of inflammatory cells across the blood-brain barrier.

On behalf of the International Society of Neuroimmunology (ISNI), the European School of Neuroimmunology (ESNI) and the Local Organising Committee, we have the pleasure to welcome you to the 10th International Congress of the ISNI and to the 10th ESNI Course.

The field of Neuroimmunology is expanding because of the growing interest in inflammation for many neurological diseases, the new immunotherapies and biomarkers available or being developed and the growth of new brain infections related with globalization or with the use of new immunotherapies. Thus, we are in the presence of an explosion of knowledge about the mechanisms of brain inflammation as well as new opportunities for intervening in neurological diseases.

We trust that the 10th ISNI Congress will represent an excellent opportunity to realize the changes in the field and to envision new perspectives for basic and clinical research.

The local Organising Committee and the International Advisory Board have set up a program containing lectures, workshops and technical demonstrations with a broad scope and the highest quality, focusing on new and promising technologies or providing feed-back from clinical observations to the lab and back.

To promote the participation to the meeting of young scientists and students from all over the world, the Local Organising Committee, together with the ISNI Board, has made special efforts to ensure the assignment of numerous travel grants, as well as to include specific training sessions in the scientific program.

The beautiful coastal town of Sitges, on the Mediterranean Sea and only 35 km South of Barcelona, will warmly welcome all ISNI attendees with its museums, places to visit and restaurants, which we hope will make this event a memorable experience.

We look forward to your active and enthusiastic participation to the meeting!

Registration desks

The registration desks are located in the hotel lobby from October 25th to 27th and in the Congress Centre from October 28th to 30th with the following schedule:

Monday	October 25, 2010	15:00 – 19:00
Tuesday	October 26, 2010	08:00 – 18:00
Wednesday	October 27, 2010	08:00 – 18:00
Thursday	October 28, 2010	08:00 – 18:00
Friday	October 29, 2010	08:00 – 18:00
Saturday	October 30, 2010	08:30 – 14:00

Participant's fee includes:

- participant's badge and congress material
- access to scientific sessions and exhibition
- abstract book
- certificate of attendance
- coffee breaks
- lunch boxes

Badge

Upon registration you will receive your congress kit with your name badge.
You are kindly requested to wear your badge during all congress sessions and events.
In case you lose your badge, please ask for a duplicate at the congress secretariat desks.

Certificate of attendance

Certificates of attendance will be distributed to all participants on site from October 29th.

Exhibition area

The exhibition area is at the Hotel Melià Congress & Conference Centre.

Opening hours are as follows:

Tuesday	October 26, 2010	09:00 – 18:00
Wednesday	October 27, 2010	09:00 – 18:00
Thursday	October 28, 2010	09:00 – 18:00
Friday	October 29, 2010	09:00 – 18:00
Saturday	October 30, 2010	09:00 – 13:00

Pre-Congress Teaching Course

The 10th ESNI Course will take place between 9:00 and 17:30 on Tuesday, October 26th. Delegates attending the course should register at the registration desks between 15:00 and 19:00 on Monday, October 25th.

Plenary Lectures

There will be four plenary lectures from Wednesday to Saturday. Lectures will take place in the Auditorium of the Hotel Melià Congress & Conference Centre.

Plenary Symposia

There will be four plenary symposia in the morning from Wednesday to Saturday. All plenary sessions will take place in the Auditorium of the Hotel Melià Congress & Conference Centre.

Concurrent Symposia

There will be ten concurrent symposia opening the congress working days from Wednesday to Saturday. All concurrent sessions will take place in the halls Auditorium, Tramuntana 2 and Tramuntana 3 of the Hotel Melià Congress & Conference Centre.

Concurrent Workshops

Workshops will be held from Wednesday to Saturday from 15:00 to 16:30. All workshops will take place in the halls Auditorium, Tramuntana 2, Tramuntana 3, Mestral and Llevant of the Hotel Melià Congress & Conference Centre.

The abstracts to be discussed have been selected by the chairs of each session. Oral communications are allotted 10 minutes for the presentation plus 5 minutes for the discussion. Authors are kindly requested to respect their presentation time. Power Point video projection will be available in all rooms for the presentations, authors must upload their presentation at the Speakers' Ready Room no later than 12:00 on the assigned date of presentation.

Poster Sessions

Posters will be on display on Wednesday, Thursday and Friday between 9:00 and 17:00 in the Posters Hall of the Hotel Melià Congress and Conference Centre.

You can place your poster on the assigned board between 19:00 of the previous day and 9:00 of the assigned date. Posters should be removed by authors between 17:00 and 19:00 on the same day of the assigned session. The Congress Secretariat will not be responsible for posters left behind. Poster size should be maximum 1 m. wide x 1,5 m. high and will be displayed vertically; The position of each poster will be marked by the poster number and title, please place your poster on the assigned board.

Authors must be present during the assigned poster session.

Underneath please find the poster sessions schedule:

Wednesday, October 27th

- PS 1 Neuroinflammation in neurological diseases I
- PS 2 Models of disease
- PS 3 Omics
- PS 4 Glial cells
- PS 5 Psychoimmunomodulation
- PS 6 Biomarkers
- PS 7 Infections
- PS 8 Pathology

Thursday, October 28th

- PS 9 Neuroinflammation in neurological diseases II
- PS 10 Therapies
- PS 11 Immunological mechanisms
- PS 12 T Cells
- PS 13 Mechanisms of nervous system damage
- PS 14 Brain blood barrier

Friday, October 29th

- PS 15 Neuroinflammation in neurological diseases III
- PS 16 B cells and antibodies
- PS 17 Stem cells
- PS 18 Innate immune system
- PS 19 Neurodegeneration
- PS 20 Clinical research
- PS 21 Brain tumors and paraneoplastic syndromes

Language

English is the official language of the congress. No simultaneous translation will be provided.

Sessions

Please make sure to be in the session hall on time as all sessions will begin as per schedule.

Coffee breaks

Coffee and tea breaks will be served in the designed areas as per schedule.

Lunch breaks

Registered participants will receive four lunch coupons, from Wednesday to Saturday. Participants attending the ESNI Course will receive a lunch coupon also for Tuesday, October 26th.

Please present these coupons in order to receive your lunch box which will be distributed in the designed areas as per schedule.

CME credits

The accreditation of the 10th ISNI Congress has been requested to the Council for Continuing Medical Education (EACCME).

The EACCME is an institution of the European Union of Medical Specialists – UEMS (<http://www.uems.be>). On the basis of the EACCME statement, the approval from the National Accreditation Authority of the country where the event takes place will be automatically recognised in all the other European countries. EACCME and the AMA signed an agreement of mutual recognition of CME credits between Europe and the USA so that American physicians attending an event in Europe can have their credits recognised in the USA.

Disabled persons

The Hotel Melià Congress & Conference Centre is equipped with facilities for disabled persons. However, if you have any special needs or disabilities, please let the organising secretariat know when registering for the congress.

Insurance

The organisers will not accept liability for individual medical, travel or personal insurance. It is highly recommended that all participants carry proper health and travel insurance.

Smoking policy

Smoking is forbidden at any time in the meeting halls, poster hall and restrooms. Your compliance is appreciated.

Mobile phones

Mobile phones must be switched off while attending a session.

Speakers' ready room

Speakers' ready room is located in the "Barcelona Room" at the hotel lobby and operates during the congress hours.

All rooms are equipped as follows:

- one large screen
- one LCD projector
- one podium microphone and monitor
- one laser pointer
- 2 radio microphones for the discussion

All invited speakers and presenting authors of accepted abstracts as oral presentation are kindly requested to visit the Speakers' ready room at least the day before their presentation time.

Speakers should clearly identify themselves and specify the room, date and time of presentation as indicated on this scientific program.

During the visit at speakers' ready room a technician will load your presentation on the congress computers, run through it and check it. Your presentation will be sent from the central server to the room where you will give your talk. Congress staff will be available in the session rooms for assistance.

All presentations will be deleted immediately after the meeting end.

We have a long-term commitment to multiple sclerosis

We want to be in the next wave of breakthrough drugs that could potentially transform the lives of people living with MS.

Jean Merrill
Vice President, Global Neuroimmunology
Cambridge, USA

Merck Serono conducts extensive research in the area of neurodegenerative diseases in order to offer new therapeutic options to patients. Our strength in immunomodulation and neurobiology research gives us a strong foothold into novel therapeutic approaches for improved symptom treatment and for the development of disease-modifying therapies. Our globally integrated Research and Development organization strives to develop innovative medicines based on scientific excellence and the highest ethical standards.

We will reach our ambitious goals thanks to people like Jean Merrill, a leading light in the field of multiple sclerosis research and one of 2,400 dedicated professionals working around four main R&D hubs in Geneva, Darmstadt, Boston and Beijing.
